

Dear Esteemed Donor, Sponsor and Partner,

On behalf of BFS Global Foundation, Scepters Corporate Media Ltd - Organizers of the AfroFutureTech iFest 2026, it is my honor to introduce the One Child A Tab (OCAT) Project—an ambitious initiative to provide 1 million underserved children with solar-powered tablets and five years of digital learning tools.

By combining technology, renewable energy, and structured educational content, OCAT addresses both poverty and food insecurity (SDG 1 & 2). BFS Global Foundation will lead implementation, community engagement, and transparent impact reporting.

We therefore invite governments, development partners, corporations, and philanthropic leaders to join us in building this platform for inclusive growth. Through collaborative partnerships and shared commitment, we can close the digital divide and empower a generation with the knowledge and skills needed to transform their communities.

Together, we can ensure that every child has the opportunity not only to learn—but to lead in the future that technology is shaping.
